## WIN the weight loss battle with this NEW product

Obesity is a rapidly growing problem that has resulted in tens of millions of people turning to expensive GLP-1 medications like Ozempic & Wegovy in hopes of shedding their excess body fat and losing weight. Not only do these prescription drugs typically cost you hundreds of dollars per month, but they also come with a long list of possible side effects including nausea, vomiting, constipation, and diarrhea. More serious potential risks include pancreatitis, gallbladder diseases, intestinal obstruction and gastroparesis.

**What if** there was a way to harness the power of nature to help you lose weight and melt away unwanted body fat without potentially dangerous side effects and **without** the pain of spending several hundred dollars per month? Fortunately, there is...and we call it **MetaboWize**.

### FACTS:

According to the Center for Disease Control (CDC), **40.3% of adults in the U.S. are now clinically obese.** In other words, these adults are carrying excess amounts of FAT on their body that leads to poor health conditions. In fact, obesity increases the risk of hypertension, type 2 diabetes, coronary heart disease, stroke, and certain cancers.

## ALL NEW LifeSource Essential nutrition starts HERE

Your body has a long list of essential nutrients it needs on a daily basis to achieve & maintain good health and to keep everything functioning inside your body like it should. In today's modern world, however, it is more difficult than ever (*some say it's virtually impossible*) to get all the key nutrients your body needs from just your diet alone.

Unless you're eating nothing but organic fruits and veggies and 'clean' meats each day, there's a good chance your body is missing (or deficient in) many of the critical vitamins and minerals it needs for peak performance. That's why you need the all-new LifeSource multivitamin/multimineral formula.

'Multivitamins' are the most popular supplements consumed in North America today. It's estimated that 24% of U.S. adults aged 20-39, 29.8% of adults aged 40-59, and 39.4% of adults aged 60 and older buy and use a multivitamin supplement each month. In fact, a large percentage of medical doctors in practice today recommend that their patients take a multivitamin supplement to support their health.

### But there's a problem...

The vast majority of the multivitamin supplements you see advertised today are cheap, poor-quality attempts to deliver what the body needs. Most offer the bare minimum amount to meet the already low 'recommended daily allowance' (RDA).

Worse yet, they are often using nutrient sources and tableting methods that make it very difficult for the body to break down and absorb. So if your body can't break it down efficiently, you get far less nutrition than what the label says... or maybe nothing at all. At Xooma, we understand this...and that's why our LifeSource multivitamin/multimineral formula is DIFFERENT.

The most expensive multivitamin you will ever take is the one that doesn't work.

# Life Source (Continued from page 1)

For starters, our synergistic formula contains **optimal daily intakes** or ODI's of each vitamin and mineral. LifeSource also has the benefit of additional research revealing proven nutrients that positively impact the biological aging of various cells and genes throughout the body. Higher quality ingredients in optimal dosage amounts leads to better absorption by the body, increased health benefits, and a far better VALUE for your money.

## What's new?

- LifeSource is now a whole-food based formula
- Includes several new vitamin and mineral sources to ensure maximum bioavailability
- Contains an exclusive Organic Fruits, Veggies & Greens blend
- Includes **Oxynea**<sup>®</sup> - clinically researched Polyphenol Concentrates blend that provides the same antioxidative protection as 2 servings of fresh fruit and vegetables
- Contains an exclusive Adaptogen Blend which includes 7 organic mushroom extracts

**Ingredient sources matter.** That's why we list the sources of every nutrient in this formula. Here are a few examples of how the new LifeSource formula is different:

We're using **methylcobalamin** which is a natural form of vitamin B12 and is more bioavailable than cyanocobalamin, a synthetic form of B12. **Magnesium bisglycinate** is used in this formula for its superior absorption potential rather than the more common and poorly absorbed magnesium *oxide*. We're also using **L-5-MTHF** which is a form of folate and is the *only* form that can cross your blood-brain barrier to carry out important brain functions (nearly half of the population has difficulty converting folic acid to this bioactive form). A final example is our **Chromium** is in the form of *polynicotinate* (instead of picolinate) for the best absorption and performance.

The new LifeSource is the most comprehensive and highest quality formula we've ever offered. And while you'd expect to pay a higher price for all the improvements we've made to this product, we're proud to announce that we've been able to create this exciting new formula with **NO increase in price!** That's right...your new LifeSource is still **just \$1.58 per day** for a 4-capsule serving (\$47.50 per bottle).

The best news is the new LifeSource is in stock now and ready for immediate delivery. Simply order **item #40** today and start experiencing the difference it will make in your daily health.

## November is National Diabetes Awareness Month

According to the American Diabetes Association, **over 38 million** adults and children have diabetes in the United States. It's not only become an epidemic in the U.S., diabetes is rapidly becoming a worldwide epidemic. According to the most recent data in 2022, the national cost of diabetes in the U.S. was more than \$412.9 billion. People who are afflicted with this disease are at risk for serious complications like kidney disease (nephropathy),

eye damage (diabetic retinopathy), heart disease & stroke, mental health issues, high blood pressure, nerve damage & amputation.

Your diet and lifestyle habits play a critical role in avoiding diabetes and getting your blood sugar under control.
